Education

Royal Melbourne Institute of Technology (RMIT)

- Bachelor of Information Technology 2017 - Present (Expected Grad 2019)
- Deans List

Victoria University

- Diploma of Information Technology (Web Development) 2016
- GPA: 4.0
- Deans List

Experience

- CSIT Mentoring program - Mentor 2/2018 - Present
 - Enhanced learning experience of fellow students with Java, C, SQL for assignments, as well as HTML5, CSS, JavaScript, and PHP for web projects.
 - Mentored multiple recurring students, taught them vital programming skills such as JUnit, debugging and good coding practices such as commenting and refactoring.

Projects

- SBC #HackTheCity - 2nd place / 18 teams - 9/2018
 - Solved pain point, "Millions are spent on new recruits & contractors for major events", with design thinking and lean canvas to ideate a solution: company wide insourcing application..
 - Used Node.js and React-Native for basic functionality on our mobile app, practiced the Kanban Agile methodology in our team of 7 for a smooth project workflow.
 - Rewarded "Most Promising Startup" by Startupbootcamp
- RMIT ITS Hackathon - 2nd place / 13 teams - 8/2018
 - 24-hour hackathon for "flipped perspectives", our proof of concept is a Twitch/FBLive inspired lecture streaming service with rooms for student collaboration in lectures. Video Streaming from remote AWS server and chat room built with Node.js WebSockets.

Other projects

- **Gift Shop** - Responsive online React/Redux store with Facebook/Google Login, Checkout Functionality and Admin functionality. REST JSON API. Group project: SCRUM weekly sprints.
- **Real Estate Sale System** - Command line based real estate sale and auction system built with Java using OOP concepts, CRUD objects and read/write to persistent text-based database.
- **Vending Machine** - Command line based vending machine utilising Linked Lists built with C, read/write to persistent text-based database.
- **Snap Sharing** - PHP based website for uploading and sharing images using SQL database.

Skills

- Languages: Java, Python, C, Golang, HTML5, CSS, JavaScript, PHP, SQL
- Other: JUnit, Jester, Node.js, ReactJs, React-Native, Redux, Git, Agile(Kanban/Scrum), Linux, Google Cloud, AWS.
